## The Learning and Teaching of Calculus Across Disciplines 2

16-20 June 2025  
Milan, Italy

### Criteria for reviewers

The paper will be reviewed by a scholar with a research expertise in calculus across disciplines selected among the participants and a member of the scientific committee who will act as meta-reviewer and make the decision about acceptance or transformation of a paper into a poster and propose suggestions for improvement.

The authors whose contribution will be accepted as a paper will have the opportunity to revise their proposal and send a new version that will be included in the pre-proceedings.

As a reviewer, please consider the following criteria while giving constructive feedback to the authors.

1. Relevance and pertinence of the approach/objectives with the Conference theme
2. Framing of the research in the literature and research questions
3. Suitability and quality of the theoretical framework
4. Suitability and explanation of the methods and the context
5. Quality of results and findings
6. Clarity of text and technical quality (language, use of the template, APA7 style)

We kindly ask you to submit your review to the submission portal **by February 21st**. If you need more time, please contact us as soon as possible to help us to manage the review process in the most effective way and provide timely feedback.
